irradiation on food is because the food produced is so full of toxic pollutants that it is high enough to kill usa residents. if we produced clean organic food hou would not need irradiation. it is expesnive to do and an additional process that drives up the cost of food, which is almost too hig to buy anymore. th eu.s. govt does not care about healthful foods for its citizens. it fees us any old crap so that profiteers can make buckets of money to put in their bank acounts while we die earlier and earlier in the usa. other countries protect their citiaens. usa fat cat bureaucrat has forgotten they ever did protect us. they are whores these days
