Document: CDC-2022-0021-0002

Comment from Hayes, Zipporah

Submitter Information

Name: Zipporah Hayes

Address:

Greensboro, NC, 28447

General Comment

I believe having population based surveillance of outcomes, needs and well being of children and adolescents with congenital heart defects will allow us to see patterns of this illness due to their environment. Having more money may allow the parents to provide more treatments for this defect than those on a lower income. Also we always need to take in account the overall wellbeing of the children no matter what their parents income is. Everyone deserves a fair chance at health care.
