General Comment

I am an SSI recipient who was determined to be disabled by the SSA in 2018. I completed my first CDR in Spring 2021. It took me 3 weeks of daily work to compile the necessary documents and information and to fill in the form. My disability causes pain and weakness in my hands and can make handwriting difficult. After compiling all of the information I needed to fill in the forms, it took me several days just to write out my answers in legible script. This pain and difficulty was compounded by the fact that the forms don't have enough space to fully and accurately respond to each question and the allotted space for additional information at the back of the packet is only 1 page, unlined. I estimate my total time spent completing the packet to be 32 hours.
