Auxin Solar Inc. ("Auxin Solar"), a minority- and woman-owned, U.S. headquartered, and U.S. operated manufacturer of crystalline silicon photovoltaic ("CSPV") modules that has been injured by unfairly traded CSPV imports, writes in support of the information collection activities of the U.S. Department of Commerce ("Commerce") pursuant to 19 CFR Part 358. As indicated in the attached letter, Auxin Solar's only negative comment concerning Commerce's information collection activities is Commerce reluctance to use those regulations even when their use is legally required, as is the case with recent emergency declaration of the President invoking Section 318(a) of the Tariff Act of 1930, as amended.
