Dear Mr. Offerman:

The USDA/Food and Nutrition Service welcomes your comment regarding SNAP's fitness for work and Employment and Training (E&T) policies.

This information collection request is not for changes in regulations to SNAP fitness for work policies. It is for a study to better understand how State SNAP agencies create and implement fitness for work policies. The information collection is necessary because States are given considerable flexibility in how they make these determinations, and the FNS wishes to gain a better understanding of how federal regulations and guidance are being applied by State SNAP agencies.

Sincerely,

Eric Sean Williams, PhD
