Good Afternoon,

This comment is referring to ICR: 202208-1140-007 with the title, Application to Make and Register a Firearm. From my understanding, there's been changes with the ruling the Alcohol, Tobacco, Firearms and Explosives wants to implement this December. It appears they are bypassing Congress with additions without notifying the General Public with the Amnesty Registration which will make millions of citizens as felons. With the ruling of Bruen, how is this following the text, history, tradition of the Constitution? the ATF is grossly misusing it's powers granted and what's happening currently needs to be stopped and looked at.
