The 21 page application is burdensome and overly time consuming for applicants and USCIS. It requests information that is not relevant such as the current employer of the spouse of the applicant. Further the wording of some of the eligibility questions is repetitive or not closely aligned with the actual law. Finally, USCIS officers at the interview stage in some offices, waste time re-asking every single question on the 21 page application. The applicant has already answered all of the questions and signed a statement of truthfulness when applying. If it were more relevant and less burdensome it could be less costly to applicant and less costly for time and resources for USCIS and maybe then it would not take over one year to get an application approved.
