- Incidents where 3 or more visitors, employees, or volunteers have similar symptoms or illnesses
- Single reports of rare or reportable diseases
- Incidents that result in death, serious injury, illness, and/or lead to overnight hospitalization
- Wildlife encounters of concern such as bites, scratches, or attacks and wildlife deaths that do not fit known patterns
- Any additional illnesses of public health concern

The information collected will be used to determine the agents, sources, modes of transmission, or risk factors so that effective prevention and control measures can be implemented.
