It is my opinion that the Civil Rights Data Collection could be greatly reduced in Kansas through collaboration with the Kansas Dept. of Education. Nearly all information provided is already collected through the variety of reports already required by KSDE. It is my hope, in an effort to prioritize the limited time and resources available by smaller school districts, the US Dept of Ed. will look deeply at only requiring the submission of information that isn't already collected. I realize that state processes and state reports may vary. That being said, I believe it reasonable that most of this information is reported to each state agency.
