General Comment

there doesnt seem to be any reason that the cdc needs this information. they have shown no need in their proposal to gather this information at all.

this appears to be busy work or intrusive work so they get a finger into everything in the us and the world. we appear to be able to do withotu this entire sincely the cdc does such lousy work anyway. they make up all this stuff and then jhaveno documentation or truth to any of it. i give this agency a grade of f minus. i think they are absentee workers who are not producing for the usa citizenry at all. i think they are just taking up time and space and in facgt are harming the usa. i think this agency needs to be shut down and defunded to zero.
