SUPPLEMENTARY INFORMATION:

I. Abstract

Public Law 100-107 (The Malcolm Baldrige National Quality Improvement Act of 1987), which established the Baldrige Performance Excellence Program and its Malcolm Baldrige National Quality Award (MBNQA), stipulates that organizational applicants for the award (see OMB Control #0693-0006) receive "an intensive evaluation by a competent board of examiners which shall review the evidence submitted by the organization and, through a site visit, verify the accuracy of the quality improvements claimed."

Per the statute, "the Director of the National Bureau of Standards shall rely upon" these examiners, as they are in essence the external workforce of the Baldrige Performance Excellence Program. Baldrige Program staff members manage and improve the award and all of its processes, but the examiners actually do the objective review of MBNQA applicants.

The Team Leader Consensus and Site Visit Surveys will be one key way that Baldrige staff members can communicate with and seek feedback from the external workforce (Baldrige Examiners). To manage these voluntary examiners (some private citizens, some government and military personnel), the Baldrige Program needs the ability to ask them of their preferences for the sector in which they will do their application review (e.g., do they want to review a health care applicant, manufacturing applicant), their availability to conduct reviews, their ability to travel on a site visit and about all of their logistical needs (e.g., dietary restrictions, cannot review an organization from a certain state due to conflicts in that state), their ability to perform particular MBNQA roles such as technical editor or team leader), their conflicts with a particular organization, etc. The Baldrige Program also needs to survey them to obtain qualitative information on performance, as being a Baldrige Examiner is

a very competitive selection.

The Baldrige Program could not perform the intensive evaluation called for in the law without surveying its own workforce about their unique needs in relation to the MBNQA process (and its subprocesses). In fact, these volunteer examiners expect to be asked their preferences, as well as given the ability to give their feedback to improve processes.

II. Method of Collection

Surveys are typically conducted via email or through a secure NIST file-sharing system if any MBNQA organization-specific information needs to be shared. Surveys can also be conducted over the phone if the number of examiners who need to be asked about a particular role or need is less than about 20. Often, a personal phone call is the best way to survey a subset of examiners, as maintaining positive relationships with examiners is very important to the program.
