

Dear HEAL Investigators:

You are cordially invited to attend the **Fourth Annual NIH HEAL Initiative® Investigator Meeting** on Feb. 21-22, 2023. This meeting will have a hybrid format with in-person and virtual opportunities to participate.

This meeting provides a unique opportunity to build connections among the HEAL community and learn about HEAL priorities and progress. Attendees will learn about findings from projects with large investments from HEAL, hear from federal speakers, and network within and outside of their research programs.

[Click here to register for the meeting.](#) Registration is required to attend.

Principal Investigators and Co-Investigators

In-person registration will be reserved for principal investigators and co-investigators through early January 2023. The in-person portion of the meeting will be held at the Bethesda North Marriott Hotel & Conference Center in Bethesda, Maryland. PIs and Co-Is are also welcome to register to attend virtually. In early January 2023, in-person registration will become available for all attendees as space allows, so please register early to ensure your in-person participation.

Additionally, investigators are encouraged to invite their community partners to accompany them to the meeting. Some travel funds are available. If you are interested in this opportunity, please email HEALinvestigatormeeting@iqsolutions.com.

Other Attendees

Additional research team members, NIH and federal staff, and other HEAL stakeholders are invited to participate in the meeting virtually. Virtual attendees will be able to enter the virtual meeting platform to attend sessions and participate in discussions with in-person attendees, present in a virtual poster session, and access additional resources.

If space permits, in-person registration may become available to other attendees beginning in January 2023. If you would like to be notified if space is available, please indicate so in the registration form.

All researchers working on a HEAL-funded project are encouraged to share a research poster. Poster-submission method will vary based on in-person versus virtual participation. For more information, please visit the Research Posters page on the registration website.

Please [click here to register for the Fourth Annual NIH HEAL Initiative® Investigator Meeting](#).

If you have any questions, please reach out to HEALinvestigatormeeeting@iqsolutions.com.

We look forward to seeing you soon.

Sincerely,

Rebecca
