My comments for OMB Control Number 1905-0129 are as follows:

I request the Surveys include questions regarding cryptocurrency mining and details pertaining to it. These miners, especially proof-of-work miners, are energy hogs demanding and getting cheap electricity while driving up energy costs for the rest of us and hastening climate change. Questions for those who generate electricity on their own as well as any utilities providing power to these facilities are needed in the Surveys.

Thank you for considering my comments.
