The ISO/RTO Council (IRC) appreciates the U.S. Energy Information Administration's (EIA) responses to the comments that the IRC submitted on Form EIA-930 Hourly and Daily Balancing Authority Operations Report and Form EIA-930A Annual Balancing Authority Generator Inventory Report. The IRC emphasizes that, given that its members will need to make software modifications to implement both form EIA-930A and the changes to Form EIA-930, completed forms should not be required any sooner than the fourth quarter of 2023. EIA should coordinate implementation schedules with individual balancing authority areas.
