Hello,

I think the explanation is fair in its reach and outline although I think some further explanation is required in regards to this paragraph ... "This form would allow the UAS Integration Office to collect the appropriate information about the stakeholder's name, preferred method of communications email address, phone number, zip code, type of flyer that would allow the Support Center Analysts to more efficiently answer the customer's specific question." ... in regard to the actual why. Although I understand the reason some may not and I think the reason needs to be more clear.

The other point I would make is how does the general public know that this FAA service is available to them? Will there be informational videos done to explain the access etc.

Regards

ML

I would suggest allowing the suggestion of legal counsel. Also, when submitted, it should all some way to send a confirmation email to one or more email addresses with the confirmation tracking code. This is what happens over on www.regulations.gov when something is filed.
