These mandates need to end today. I have not been able to see my sister who lives in the USA in three years because of these mandates. These vaccine mandates for visitors to USA continues to keep families apart. They are very cruel and unnecessary as there is so much evidence out there that these "vaccines" have killed and injured millions of people. And there is so much evidence that these "vaccines" do not prevent people from getting a virus.

It's not fair to treat law abiding visitors that come to the USA like this. We who are not vaccinated are not a danger to anyone. EVEN the CDC admits there is no difference between vaccinated and unvaccinated. I have spent thousands of dollars in the USA as a law abiding visitor for years so it is not fair to treat us like we have a disease when we don't. I find it quite hypocritical to allow illegal immigrants to cross the border unvaccinated but unvaccinated law abiding visitors are not allowed to go to USA. Makes no sense whatsoever. Please end these mandates today.
