It would be consistent with the pure idiocy demonstrated by the CDC and Biden administration to keep the restrictions in place.. BUT.. if someone wants to actually value the science then the CDC would stop trying to force the "vaccine" on everyone and Biden would revoke the proclamation restricting unvaccinated air travelers. The vaccination doesn't work. It doesn't keep anyone from getting COVID or passing it on, so what's the point? Clearly there's an agenda here and it is NOT about lessening the spread of COVID. Drop the facade. Drop the restrictions. Pfizer and friends have made more than enough money off everyone who was gullible enough to get jabbed. Times up. Stop this nonsense.
