No. I do not support the continued collection of vaccine status. The covid vaccine does not stop transmission (although we were told that it does). It is wrong that a covid positive, vaccinated person could enter the US while a covid negative unvaccinated person would be denied entry. Why is natural immunity ignored? It seems as though the vaccine requirement is a form of punishment and a means to coerce more people to get vaccinated. We have family in the US who we have not seen for a couple of years. My daughter's boyfriend lives in the US-she has not been able to see him because she is "unvaccinated" although she has had and completely recovered from covid. It does not make sense and it is a waste of manpower and money to continue to collect this information.
