It is absolutely disgusting that the CDC and president continue to require this. The collection of the information is justified by "science" but the CDC are failing to follow their own "science". It has been proven and was admitted by the current CDC director that those vaccinated against Covid-19 and those unvaccinated against Covid-19 can both transmit and become infected by Covid-19 so the CDC guidance no longer distinguishes between them. Someone who was vaccinated against Covid-19 over two years ago can enter the country WITH Covid-19 yet someone who is healthy with natural immunity cannot. The United States is now one of the few countries in the world continuing this collection of information and requirement for unscientific reasons. We have been told by the CDC vaccine protection weans relatively quickly so even if it DID prevent transmission which it does not, majority of vaccinated people would no longer have protection. Majority of the public comments see this as a waste of resources and discriminatory in every possible way.
