Covid is here to stay whether one is vaccinated or not. Vaccination hasn't stopped the virus. I believe we need to move on from

This and having a mandate isn't going to help any. It's truly unfair for those that are autoimmune compromised who can't get the vaccine and aren't able to fly anywhere because of the mandates. It's time to take the mandate off and let everyone live their lives again!!!

I say no to extending the mandate and just take it off completely
