I strongly oppose this Covid-19 vaccine mandate for noncitizen&nonimmigrant air travelers. First, Covid vaccine is proved to be ineffective as it doesn't prevent the spread of virus at all. All of my family and friends who have been vaccinated had had covid after the shot, more than once for some of them. And they told me about the various side effects of the vaccine that may pose great health risks. Second, my mom is a senior whose body doesn't respond well to any vaccines, so it would be detrimental to her health to take the vaccine. She misses her three grandsons a lot. If the mandate continued, she'd never been able to visit us in the future, and that's inhumane! I sincerely and urgently hope that this vaccine mandate be lifted up immediately, so that my mom could come visit us. In fact, the proof of 48 hour negative tests before boarding is enough for these air travelers.
