So I was looking at a winter vacation from Canada and saw a great deal to Hawaii, then the ridiculous notice of a required vax status verification. Are You kidding, the whole world has opened up and you permit anyone from anywhere else to cross your borders or get on a plane but not Canadians. Not a single piece of evidence supports your position. Covid , the seasonal flu is here to stay and the "vaccine" neither prevents spread not prevents illness and now your hospitalizations are overwhelmingly the vaccinated.  
How brain dead are you people?
