Question:

What is the scientific basis for this overreach on fundamental freedoms and rights? After 3 years of unsubstantiated, unlawful measures using a now thoroughly debunked and never legal emergency measure, the public demands to hear clear scientific reasoning how this regulation can be substantiated to any extent into the future? The injectables called 'Covid Vaccines' have been exposed to not prevent disease and also failing transmission prevention BY ADMISSION OF THEIR MANUFACTURER, their official product trial data and by health data collected on the populations of many countries by esteemed leaders in science. Whereas we now have evidence from a number of prophylactic interventions using existing medications and protocols to be highly effective. You have failed ethical and legal conduct and transparency towards your citizens and existing international regulations and agreements. We demand that you now open uncensored and unrestricted debate within the international scientific community and fully disclose US involvement in gain of function research predating what you call a pandemic requiring emergency overreach. A flood of high profile international and domestic research concerning the disease called Covid -19 now exists and you well know where to find it.

If you have any whatsoever legitimate foundation in this regulation you will not hesitate to openly debate either Steve Kirsch and an agreed upon panel of scientists or at the very least openly and clearly state and scientifically defend your actions.
