To whom it may concern, please rescuing the extension of request of vaccine for air traveller, as the scientists are stating, the pandemic is over and we need to live with COVID especially that the vaccination rate is higher than any other campaign and especially that this vaccine doesn't stop the transmission. COVID is nothing but the flu at this point and it is not worth prolonging the travel lines and making the process painful for border agents. Let's be a neighborly countries as we always have been. Allow everyone to travel freely by air and by land.

Thanks for your time and for revising this request.
