The CDC director said this yesterday

"We can't stop the spread of #COVID19, but pre-departure testing and the requirement to show a negative test result when flying from China to the U.S. can help slow the spread as we work to identify and understand any potential new variants. Read the Order: <https://bit.ly/3jKDgq8>"

This is the link of her tweet

<https://twitter.com/CDCDirector/status/1608956958912155648?s=20&t=3GcnKOhqxqxH38EkCsANKg>

If the director publicly says that we CAN'T stop the spread then why is this proof of vaccination being required? If the CDC knows that the vaccine DOES NOT stop spreading the virus, Not getting the virus, not getting sick or dying, then there's absolutely no proof or valid reason to approve this collection from keep happening!
