The covid injections do not stop transmission or infection and carry serious risks including myocarditis. No one should be compelled to take this dangerous experimental drug with no long term safety data.

We are one of the few countries requiring this useless injection to be allowed to enter. It is past time we stop this or we will be the laughing stock of the world. Tennis champions, family members, students and other travelers and business people are not able to enter because of this nonsensical mandate. Please end it immediately.
