Can you please restore our democratic freedom of being allowed to enter the U.S. to visit our loved ones (in my my case my brother, his wife and children? I shouldn't have to ask for this. My children have never been, we ant to go now. A simple negative test will suffice, the COVID vaxes don't prevent transmission. I also need to visit a specialist doctor to finally try to get rid of my decades'long disease. The U.S is vaxed obsessed and in the hands of big pharma. It's time to stand up to this corruption and change the system. I shouldn't have to ask for this.
