I am strongly against this proposal. The reasons are:

1. Almost no country in the world has this policy.
2. Covid Vaccine does not prevent infection or transmission at all.
3. Covid Vaccine status does not guarantee a negative PCR.
4. It is discrimination to these passengers.
5. The proposal is lacking of scientific base and logic.
6. The purpose of this proposal has no base at all.
7. There no established data to show how many vaccines one needs. In fact, no matter how many doses one took, one can be infected anyway.
8. This policy is against "my body my choice" principle.
