St. Luke's Health System agrees with the revisions to remove the fax number field of the 340B Primary Contact and Authorizing Official Information section and requests consideration for an optional second email field on the Primary Contact for the Covered Entity and for the Manufacturer that will appear as public information on OPAIS. Covered Entities and Manufacturers are currently limited to using mailing addresses and phone numbers for communications. During the Public Health Emergency, employees of organizations may be working remote, therefore email notifications would be a preferable method of communication.
