**PART I.—GENERAL INFORMATION**

**Background.**— On January 23, 2018, the President, pursuant to section 203 of the Trade Act of 1974 (19 U.S.C. 2253) (the Act), issued Proclamation 9694, imposing a safeguard measure on imports of certain residential washers and parts thereof in the form of a tariff-rate quota, effective February 7, 2018.

On January 23, 2020, pursuant to sections 204(b)(1)(B) and 204(b)(2) of the Trade Act (19 U.S.C. 2254(b)(1)(B) and (b)(2)), the President issued Proclamation 9979 to modify the action taken in Proclamation 9694 by allocating on a quarterly basis, within-quota quantities of 1.2 million units during the third year of the action, beginning February 7, 2020.

On December 8, 2020, in response to a petition filed on behalf of Whirlpool Corporation, Benton Harbor, Michigan, the Commission issued its determination and report pursuant to section 204(c) of the Act (19 U.S.C. 2254(c)), finding that the safeguard measure continued to be necessary to prevent or remedy the serious injury to the domestic industry, and that there was evidence that the domestic industry was making a positive adjustment to import competition (see Large Residential Washers: Extension of Action, Inv. No. TA-201-076, USITC Publication 5144, December 2020). On January 14, 2021, the President issued Proclamation 10133 (86 FR 6541), pursuant to section 203(e)(1)(B) of the Trade Act (19 U.S.C. 2253(e)(1)(B)), extending the safeguard measure on large residential washers through February 7, 2023.

Section 204(d) of the Act requires the Commission to evaluate the effectiveness of the actions in facilitating positive adjustment by the domestic industry to import competition, consistent with the reasons set out by the President in the report submitted to the Congress under section 203(b) of the Act, and to submit a report to the President and the Congress no later than the 180th day after the day on which the actions taken under section 203 are terminated. Questionnaires and other information pertinent to this proceeding are available at <https://ids.usitc.gov/case/4559/investigation/8352>.

**Products covered by the scope of this measure**

**Large residential washers.**—The products covered by the investigation are all large residential washers and certain parts thereof.

The term “large residential washers” denotes all automatic clothes washing machines, regardless of the orientation of the rotational axis, with a cabinet width (measured from its widest point) of at least 24.5 inches (62.23 cm) and no more than 32.0 inches (81.28 cm), except as noted below.

**Covered parts.**-- Also covered are certain parts used in large residential washers, namely: (1) all cabinets, or portions thereof, designed for use in large residential washers; (2) all assembled tubs<sup>1</sup> designed for use in large residential washers which incorporate, at a minimum: (a) a tub; and (b) a seal; (3) all assembled baskets<sup>2</sup> designed for use in large residential washers which incorporate, at a minimum: (a) a side wrapper;<sup>3</sup> (b) a base; and (c) a drive hub;<sup>4</sup> and (4) any combination of the foregoing parts or subassemblies.

---

<sup>1</sup> A “tub” is the part of the washer designed to hold water.

<sup>2</sup> A “basket” (sometimes referred to as a “drum”) is the part of the washer designed to hold clothing or other fabrics.

<sup>3</sup> A “side wrapper” is the cylindrical part of the basket that actually holds the clothing or other fabrics.

<sup>4</sup> A “drive hub” is the hub at the center of the base that bears the load from the motor.

**Products excluded from the scope of this measure**

**(1) Stacked washers-dryers & commercial washers**

Excluded are stacked washer-dryers and commercial washers. The term “stacked washer-dryers” denotes distinct washing and drying machines that are built on a unitary frame and share a common console that controls both the washer and the dryer. The term “commercial washer” denotes an automatic clothes washing machine designed for the “pay per use” segment meeting either of the following two definitions:

(1) (a) it contains payment system electronics;<sup>5</sup> (b) it is configured with an externally mounted steel frame at least six inches high that is designed to house a coin/token operated payment system (whether or not the actual coin/token operated payment system is installed at the time of importation); (c) it contains a push button user interface with a maximum of six manually selectable wash cycle settings, with no ability of the end user to otherwise modify water temperature, water level, or spin speed for a selected wash cycle setting; and (d) the console containing the user interface is made of steel and is assembled with security fasteners;<sup>6</sup> or

(2) (a) it contains payment system electronics; (b) the payment system electronics are enabled (whether or not the payment acceptance device has been installed at the time of importation) such that, in normal operation,<sup>7</sup> the unit cannot begin a wash cycle without first receiving a signal from a bona fide payment acceptance device such as an electronic credit card reader; (c) it contains a push button user interface with a maximum of six manually selectable wash cycle settings, with no ability of the end user to otherwise modify water temperature, water level, or spin speed for a selected wash cycle setting; and (d) the console containing the user interface is made of steel and is assembled with security fasteners.

**(2) Top load residential washers with PSC/belt drive/clutch**

Also excluded are automatic clothes washing machines that meet all of the following conditions: (1) have a vertical rotational axis; (2) are top loading;<sup>8</sup> (3) have a drive train consisting, inter alia, of (a) a permanent split capacitor (PSC) motor,<sup>9</sup> (b) a belt drive,<sup>10</sup> and (c) a flat wrap spring clutch.<sup>11</sup>

---

<sup>5</sup> “Payment system electronics” denotes a circuit board designed to receive signals from a payment acceptance device and to display payment amount, selected settings, and cycle status. Such electronics also capture cycles and payment history and provide for transmission to a reader.

<sup>6</sup> A “security fastener” is a screw with a non-standard head that requires a non-standard driver. Examples include those with a pin in the center of the head as a “center pin reject” feature to prevent standard Allen wrenches or Torx drivers from working.

<sup>7</sup> “Normal operation” refers to the operating mode(s) available to end users (*i.e.*, not a mode designed for testing or repair by a technician).

<sup>8</sup> “Top loading” means that access to the basket is from the top of the washer.

<sup>9</sup> A “PSC motor” is an asynchronous, alternating current (AC), single phase induction motor that employs split phase capacitor technology.

<sup>10</sup> A “belt drive” refers to a drive system that includes a belt and pulleys.

<sup>11</sup> A “flat wrap spring clutch” is a flat metal spring that, when engaged, links abutted cylindrical pieces on the input shaft with the end of the concentric output shaft that connects to the drive hub.

**(3) Front load residential washers with CIM/belt drive**

Also excluded are automatic clothes washing machines that meet all of the following conditions: (1) have a horizontal rotational axis; (2) are front loading;<sup>12</sup> and (3) have a drive train consisting, inter alia, of (a) a controlled induction motor (CIM),<sup>13</sup> and (b) a belt drive.

**(4) "Extra-wide" residential washers**

Also excluded are automatic clothes washing machines that meet all of the following conditions: (1) have a horizontal rotational axis; (2) are front loading; and (3) have cabinet width (measured from its widest point) of more than 28.5 inches (72.39 cm).

Large residential washers are currently classifiable under subheading 8450.20.00 (statistical reporting numbers 8450.20.0040 and 8450.20.0080) of the Harmonized Tariff Schedule of the United States (HTSUS). They may also be imported under HTSUS 8450.11.0040, 8450.11.0080, 8450.90.2000, and 8450.90.6000.<sup>14</sup> The HTSUS provisions are for convenience and customs purposes; the written description of the scope is dispositive.

**Reporting of information.** --If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

**Confidentiality.** --The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 CFR §§ 206.17(a)(1) and 206.52(c)). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

**Verification.** --The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

**Release of information.** --The information provided by your firm in response to this questionnaire, as well as any other confidential business information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Trade Act of 1974 (19 U.S.C. § 2252(i)) and sections 206.17 and 206.52 of the Commission's Rules of Practice and Procedure (19 CFR §§ 206.17(a)(1) and 206.52(c)). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

---

<sup>12</sup> "Front loading" means that access to the basket is from the front of the washer.

<sup>13</sup> A "controlled induction motor" is an asynchronous, alternating current (AC), polyphase induction motor.

<sup>14</sup> Large residential washers and parts and certain subassemblies covered by the scope are currently subject to tariff-rate quotas under a safeguard measure imposed effective February 7, 2018, under subheadings 9903.45.01 and 9903.45.02 (large residential washers) and 9903.45.05 and 9903.45.06 (covered parts) and related legal notes.

**D-GRIDS tool.**--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage ([https://www.usitc.gov/trade\\_remedy/question.htm](https://www.usitc.gov/trade_remedy/question.htm)) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is optional. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDs tool are available within the D-GRIDs tool itself.

**Correcting valid number error messages.**--If you are completing this questionnaire in a country that uses periods (".") to delineate multiples of 1000 (i.e., one million would appear as \$1.000.000 instead of as \$1,000,000), you may be unable to enter in numbers greater than 999 in the numeric form fields. This issue stems from your computer's number formatting setting (i.e., not the MS Word document itself, but the computer from which you are opening up the document). In the United States commas (",") delineate multiples of 1000 and periods (".") delineate fractions less than one. Many EU and other countries use the reverse where multiples of 1000 are delineated with periods (".") and fractions less than one are delineated with commas (","). The U.S. International Trade Commission's questionnaires are set-up in the United States with the U.S. number formatting. When this formatting interacts with a computer set to EU or other country number formatting, we believe this may cause this issue.

The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete the questionnaire.

To temporarily change your computer's number settings to U.S. settings, please do the following (for Microsoft Windows Operating system):

- START
- Control Panel
- Region and Language (under Clock, Language, and Region category)
- Format tab
- Change the Format from your existing one (e.g., "Italian (Italy)") to "English (United States)" (see screen shots below)

When you do this the number "twelve million dollars and thirty five cents" would change from \$12.000.000,35 (Italy format) to \$12,000,000.35 (U.S. format), and then there will be no conflict with the USITC importer questionnaire form. When you finish reporting the data then you can close the questionnaire and switch back to Italy (or your country) settings.
