Acknowledgments

The Office of People Analytics (OPA) is indebted to numerous people for their assistance with the *2019 Survey of Reserve Component Spouses (2019 RCSS)*, which was conducted on behalf of the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The survey program is conducted under the leadership of Dr. Paul Rosenfeld, Director of OPA's Center for Retention and Readiness (OPA[R&R]).

Policy officials contributing to the development of this survey included Stacey L. Barnes, from the Office of the Assistant Secretary of Defense for Reserve Affairs, and Dr. Cathy Flynn (Military Community and Family Policy). The survey is currently coordinated with Dr. Towanda Street (Military Community and Family Policy).

OPA's R&R, under the guidance of Carol Newell, Deputy Director, is responsible for the development of questionnaires in the survey program. The lead survey design analyst was Malikah Dorvil. In addition, she designed the unique presentation of complex items used in this tabulation volume. Survey Operations, previously under the guidance of Margaret Coffey, Team Lead, is responsible for the survey database construction and archiving. The operations analyst on this survey was Jason Haynes, with oversight provided by Amy Campbell, both of Fors Marsh Group (FMG). Jason Haynes used OPA's Statistical Analysis Macros to calculate the estimates presented in this tabulation volume.

OPA's Statistical Methods Team, under the guidance of David McGrath, Chief Statistician, was responsible for all statistical aspects of this survey, including sample frame development, sampling, weighting, imputation, and the implementation of statistical hypothesis testing used in the survey program. The lead sampling analyst was John Chantis and the weighting analysts on this survey were Alex McMillan and Stephen Busselberg, both of FMG. Susan Reinhold provided programming support for the sampling and weighting tasks. Data Recognition Corporation (DRC) performed data collection and editing.

Luis Carias, FMG, formatted and assembled this tabulation volume using OPA's Survey Reporting Tool. A team consisting of Amy Campbell, Malikah Dorvil, Jason Haynes, Dr. Carla Scanlan, and Dr. Rachel Wynn completed quality control for this tabulation volume.

2019 SURVEY OF RESERVE COMPONENT SPOUSES: TABULATIONS OF RESPONSES

Introduction to the Survey

The Office of People Analytics (OPA) conducts both web-based and paper-and-pen surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire Department of Defense (DoD) community on a wide range of personnel issues. OPA's Center for Retention and Readiness (OPA[R&R]) surveys are in-depth studies of topics and populations, often requiring both web-based and paper-and-pen surveys.

This report contains tabulations of responses from the *2019 Survey of Reserve Component Spouses (2019 RCSS)* conducted January 22, 2019 to June 7, 2019. This introduction (1) summarizes the survey content, (2) defines the total population surveyed and the subgroups used in tabulations of responses, (3) summarizes the survey methodology,¹ and (4) provides details on how to use the tabulations. The tabulations and a copy of the survey items follow this introduction.²

Survey Content

The *2019 RCSS* continues a line of research on Reserve spouses that began with the *1986 Reserve Components Survey of Guard/Reserve Spouses*. In 1992, 2000, 2006, 2008, 2009, 2012, 2014, and 2017, OPA conducted subsequent surveys of Reserve spouses. Many key topics covered by the *2019 RCSS* were also included in its predecessors; however, questions have been updated, expanded, or streamlined in the *2019 RCSS*. The survey was administered by both web and paper-and-pen questionnaires. The web questionnaire appears in Appendix A, and the paper-and-pen questionnaire appears in Appendix B. The survey was subdivided into the following 10 topic areas:

1. *Background Information*—Marital status and number of dependents; member's current status and years of military service; and spouse's education, race/ethnicity, age, gender, years as a military spouse, and housing distance to military base/installation.
2. *Your Spouse's Activations/Deployments*—Member's time away from home, activations and deployments in the last 24 months, and location of member's most recent deployment. Spouse's coping with and preparedness for member's deployment, spouse's stress during activation/deployment, spouse's use of and satisfaction with military-provided programs or services

¹ Details on survey methodology are reported by OPA (2019b).

² The survey was administered via the web and paper-and-pen questionnaires. Question numbering differed between the web and paper-and-pen questionnaires. The tabulations follow the order of items used on the web administration. Appendix A provides the order of items used on the web and Appendix B provides the order of items used on the paper-and-pen administration.

- during member's deployment, impact of member's activation/deployment on spouse's expenses/employment, problems experienced by spouses during more recent deployment, and impact of member's most recent deployment on spouses and family. Military-provided support for families, unit-provided communication for spouse with member while deployed, use of and satisfaction with unit or Service point of contact, use of and satisfaction with reunion and reintegration support services, and spouse's readjustment to member's return.
3. *Effect of Deployments on Children*—Emotional/behavioral impact of deployment on child most impacted, and ways child(ren) cope with deployments.
 4. *Activation/Deployment Expectations*—Changes in member's lengths of activation/deployment in past 24 months, spouse's overall preparation for future deployments, and spouse/member's financial steps taken to prepare for deployments.
 5. *Feelings About the National Guard/Reserve*—Spouse's overall satisfaction with and attitude toward the National Guard/Reserve way of life, their support for member's participation in the National Guard/Reserve, factors affecting their support; and their expectations for time away from home in the past year and impact of those expectations on their support.
 6. *Well-Being*—Spouse's perceptions of stress and mental health problems, problems with marital relationship in the past year, spouse/member's current financial condition, and health-related quality of life.
 7. *Medical/Dental Coverage*—Eligibility and use of TRICARE medical and dental programs in the past 24 months, and comparisons between TRICARE and civilian medical and dental plans.
 8. *Internet Communications*—Spouse's participation in online communities.
 9. *Employment*—Spouse's military and employment status.
 10. *Programs and Services*—Use of Family Advocacy Program (FAP), New Parent Support Program (NPSP), and Military OneSource.

Population and Reporting Categories

The target population for the 2019 RCSS consisted of spouses of Reserve component members from the Selected Reserve in Reserve Unit, Active Guard/Reserve (AGR/FTS/AR;³ Title 10 and Title 32), or Individual Mobilization Augmentee (IMA) programs from the Army National Guard (ARNG), U.S. Army Reserve (USAR),

³ Names for this program vary among Reserve components: AGR/FTS/AR is a combination of Active Guard/Reserve (AGR), Full-Time Support (FTS), and Active Reserve (AR).

U.S. Navy Reserve (USNR), U.S. Marine Corps Reserve (USMCR), Air National Guard (ANG), and U.S. Air Force Reserve (USAFR) who were below flag rank. In addition, for the spouse to remain eligible they must indicate that at the time of the survey they were currently married to a Reserve component member.⁴ Survey results are presented for the total DoD population and by a variety of reporting categories. To form the reporting categories for the tabulations, respondents are classified by administrative record data (from the *Reserve Components Common Personnel Data System [RCCPDS]*) for member categories of Reserve component, paygrade, and Selected Reserve program. The remaining reporting categories are based on survey self-report. Definitions for reporting categories follow:

- *Member Component*—The categories include Army National Guard (ARNG), U.S. Army Reserve (USAR), U.S. Navy Reserve (USNR), U.S. Marine Corps Reserve (USMCR), Air National Guard (ANG), and U.S. Air Force Reserve (USAFR).
- *Member Paygrade*—The *Enlisted* subgroup includes all enlisted paygrades (E1–E9). The *Enlisted* subgroup is broken into the following groups: *E1–E4* and *E5–E9*. The *Officers* subgroup includes warrant officers and commissioned officers (*O1–O3* and *O4–O6*).
- *Member Component by Paygrade*—The categories include each of the components by enlisted and officer paygrade groups.
- *Member Selected Reserve Program/Activation Status*—The category *Reserve Unit* is comprised of members from each Reserve component who attend weekend drills with Reserve units. *AGR/FTS/AR* is comprised of members in full-time service. *IMA* includes Individual Mobilization Augmentees from the USAR, USNR, USMCR, and the USAFR.
- *Activated/Deployed—Not Activated Past 24 Months* includes members who were not called to active duty in the past 24 months. *Activated Past 24 Months* includes members who had been involuntarily or voluntarily called to active duty for more than 30 consecutive days in support of a contingency in the past 24 months under the provision of 10 USC 12301(a) (Full Mobilization), 10 USC 12301(d) (Voluntary Active Duty), 10 USC 12302 (Partial Mobilization), or 10 USC 12304 (Presidential Reserve Callup). *Deployed Past 24 Months* includes members who had been deployed in the past 24 months. *Not Deployed Past 24 Months* includes members who had not been deployed in the past 24 months.
- *Spouse Gender*—This category is self-explanatory.

⁴ A Reserve component member married to another Reserve component member would be eligible for the survey depending on their spouse's status, not their own.

- *Spouse Education—No College/Some College* includes those without any college credit and those with some college credit, including a two-year degree, but does not include those with a four-year degree. *4-Year Degree* includes those with a four-year degree and those with some graduate school, but no graduate or professional degree. *Graduate/Professional Degree* includes those with master's, doctorate's, and other professional degrees.
- *Spouse Race/Ethnicity*—Categories are consistent with requirements of the *Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity* (1997). *Total Minority* includes all persons marking one or more of the races other than White and/or marking that they are Spanish/Hispanic/Latino. *Non-Hispanic Black* includes persons marking only Black or African American and not reporting being Spanish/Hispanic/Latino. *Hispanic* includes anyone marking that they are Spanish/Hispanic/Latino, regardless of how they answered the question on race.
- *Spouse Age*—Categories include *30 Years Old or Younger*, *31 to 40 Years Old*, and *More Than 40 Years Old*.
- *Family Status—With Child(ren)* includes spouses who have at least one child or other legal dependent 17 years old or younger. *Without Child(ren)* includes spouses who do not have a child or other legal dependent 17 years old or younger.⁵

Survey Methodology

The web survey administration process began on January 11, 2019, with the mail out of notification letters to members of the sample. The notification letter explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail and postal reminders were sent to encourage survey participation. Data were collected between January 22, 2019, and June 7, 2019. Paper surveys were mailed on January 24, 2019, to those who did not respond via the web.

Single-stage, nonproportional stratified random sampling⁶ procedures were used. The sample consisted of the spouses of 50,815 members drawn from the sample frame constructed from DMDC's *August 2018 RCCPDS*. Spouses of the sample became ineligible if they 1) were no longer on DMDC administrative files or 2)

⁵ Without Children includes some percentage of spouses who may have children over 17 years old, therefore, child-related responses may appear in this category.

⁶ In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, spouses might be grouped by the gender and Reserve component of their husband or wife (e.g., spouses of all male USAR personnel in one group, spouses of all female USNR personnel in another). Within each group, spouses of Reserve members are chosen at random. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze. Weights are used so that groups are correctly represented in the analyses.

indicated in the survey or by other contact (e.g., telephone calls to the data collection contractor) that they were divorced, widowed, or their husband or wife was no longer in a National Guard/Reserve component, as of January 22, 2019 (2.85% of the weighted sample).

Completed surveys (defined as 50% or more of the survey questions asked of all participants being answered) were received from 6,596 eligible respondents. The overall weighted response rate for eligibles, corrected for nonproportional sampling, was 15.1%.

Data were weighted using an industry standard process. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The process of weighting consists of the following steps:

- *Adjustment for selection probability*—Probability samples such as the sample for this survey are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.
- *Adjustments for nonresponse*—Some sampled spouses do not respond to the survey. Continuing the previous example, suppose only half of the spouses sampled (i.e., 500 out of 1,000) completed and returned a survey. Because the unweighted sample size would only be 500, weights are needed to project the sample up to the subgroup population total (10,000). In this case, the base-weighted respondents would sum to only 5,000 weighted respondents. To adjust for nonresponse, the base weights are multiplied by the reciprocal of the response rate. In this example, the base weight (10) is multiplied by the reciprocal of the response rate (2) to create a new weight of 20. The weighted sample sums to the subgroup population total of 10,000.
- *Adjustment to known population values*—The first stage of weighting accounts for unequal probabilities of selection while the second is based on population characteristics that are known to be correlated with response propensity. Because the sample design and adjustments for nonresponse cannot take into account all demographic differences related to who responds to a survey and how they respond, auxiliary information is used to reduce the potential bias of survey estimates. For this reason, a final weighting adjustment is computed that reproduces population totals for important demographic groupings related to who responds to a survey and

how they might answer the survey. Suppose in our example the population for the subgroup was 8,500 men and 1,500 women, but the nonresponse-adjusted weighted estimates from the respondents were 7,000 men and 3,000 women. To reduce this possible bias and reproduce known population totals, the weights would be adjusted by 1.21 for men and 0.5 for women so that the final weights for men and women would be 24.3 and 10, which would give unbiased estimates of the total and of women and men in the subgroup.

Table 1 (page 8–9) shows the number of respondents and the portion of total respondents in each reporting group. Also shown are the *estimated* number of respondents and the *estimated* portion of total respondents in each reporting group. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number sampled, as well as differences in response rates.

Tabulation Procedures

Tabulations⁷ for each question from the survey are shown on a set of facing pages. The text of questions and response options are shown at the top of the even-numbered pages. To compress the width of columns in the tables, the response options are shown with a number or letter; then, that number or letter is used as the column heading for the responses. The central feature of the tabulations is the percentage of spouses choosing the response options indicated by the column heading. Within a set of response options, percentages may not add to 100% due to rounding.

Where an item lends itself to presentation as an average, that average is also shown as a number estimate and in a bar chart. The averages lend themselves to a quick scan for reporting groups differing from other similarly defined groups. Where a true response continuum is available (e.g., number of children), the mean of that continuum is presented; in other cases, the responses are averages of the numeric scales presented with the response options. Where there is a simple binomial response (e.g., yes/no), only one percentage is presented. In this case, the bar chart represents that percentage.

On each page of tabulations, the first column lists the reporting group shown in that row. The second column, *Percent Responding*, lists the portion of the reporting group represented in the estimates in that row. In most cases, if this percentage is not 100, it reflects item nonresponse, and the table note indicates that “Percent responding are Reserve component spouses who answered the question.”

Not all questions will apply to every respondent. Respondents to the paper-and-pen version of the survey are instructed to skip questions that do not apply to them (based on their answers to previous questions). Where possible, the web survey

⁷ Details of data editing and preparation are provided by OPA (2019a).

is programmed to skip respondents over questions that do not apply to them. For example, Q63 (How do the following aspects of your or your family's TRICARE medical coverage compare to what is available in the civilian world?) does not apply to those who marked in Q62 that they have not used TRICARE and civilian medical benefits in the past 24 months or who marked in Q61 that they were not TRICARE eligible. The table note for this question indicates that the "Percent responding are Reserve component spouses who answered the question and who used both TRICARE and civilian medical benefits in the past 24 months (Q61/Q62)."

The survey does not always skip questions that do not apply to the respondents. In the tabulations, *Does not apply* responses are typically included in the percentages in the *Percent Responding* column. For example, Q43 asked spouses if their child continued to participate in normally scheduled activities while the Reserve component member was deployed. Respondents can indicate the question does not apply to them. In other cases, the *Does not apply* response is tabulated separately. For example, Q32 asked spouses how satisfied they were with the assistance they received from the unit or Service point of contact. Responses of *Does not apply; I did not interact with the unit or Service point of contact* were tabulated separately, as responses to the constructed question *Did you interact with the unit or Service point of contact?*

Because the survey contains open-ended questions, not all responses are tabulated. For example, Q78 asked spouses about how the military could have provided better support to them and/or their family. Since it is not feasible to tabulate the wide range of responses, the open-ended responses for Q78 are not tabulated.

Paper and Web Survey Comparability

On occasion, the paper and web versions of the survey differ. These differences result from the technological advantages and requirements available in a web-based survey. Question stems differ slightly between the paper and web versions of the survey. On the paper version of the survey, question stems will refer to specific survey items, whereas questions on the web version are not numbered. The web version of the survey contains additional survey items, as well as more open-ended questions.

In other cases, the response option of *Does not apply* on the paper version is not necessary because the question is asked as separate items on the web survey. For example, in Q72 of the paper version, respondents are asked to indicate their main reason for working part-time instead of full-time. Spouses could either mark one of the provided reasons or *Does not apply, I work full-time*. On the web version, respondents were asked in preceding questions whether they had done any work for pay or profit in the previous week and how many hours they had worked. If respondents reported working for 35 or more hours (Q71), the survey automatically skipped over the question asking for reasons for working part-time, because their previous responses had established them as full-time.

In constructing the dataset that combines responses from paper and web surveys, the web version of questions was typically used. The responses to the paper-and-pen version of the questions were recoded to comply with the web version. Exceptions may occur when the tabulation of a survey item would benefit from presenting responses in a manner representative of the total population, as opposed to only the applicable population, by coding respondents who were skipped over the question to force their inclusion.

Combining Information From Multiple Items or Response Options

Tabulations in this volume generally present data for individual survey questions.⁸ There are four exceptions. The first type of exception is where the results for multiple items are presented on a single set of pages.

- Grouped subitems (e.g., Q26a–e) are presented together for ease of comparability between subitems. In Q26a–e, spouses were asked whether they experienced a change in household management skills, personal health/fitness, and/or other personal characteristics as a result of deployment. In addition to a tabulation showing the percentage of those who indicated “Increased,” “No change,” “Decreased,” or “Not applicable” for each item, a composite tabulation shows the total percentage of those who indicated “Increased” to any of the subitems a–e. The proportion of members answering “Increased” on each subitem is calculated based on a denominator including members who answered “Increased” or who did not

⁸ Demographic information based on member administrative data is also presented. For example, member Reserve component, paygrade, and spouse gender were constructed from administrative data.

answer the subitem but answered at least one other subitem in the group. This type of coding is used on all grouped subitems throughout the tab volume because it permits presentation of multiple subitems on one page, with correct and complete percent responding information for all subitems.

The second exception is when an item is constructed using survey responses from individual or multiple survey items to create an item that is not present on the base survey. An example is provided below, and any item that is identified as "constructed" combines survey responses to present results in a new, informative way.

- Constructed items use logic based on the wording of individual or multiple items to combine and present findings in an informative way that was not on the base survey. For example, Q42 asks participants about the importance of various factors, such as communication with the deployed parent, and stability of household, that help their child cope with their spouse's deployment and whether the factor was applicable to the child. The first presentation for this question displays the percentage of spouses indicating the factor was applicable, and the second presentation indicates the degree of importance for each factor among those spouses who indicated the factor was applicable.

The third exception is where spouses can provide multiple answers to a single question.

- In Q9, spouses were asked to mark one or more races. The tabulations show the percentage who responded that they were *White, Black or African American, American Indian or Alaska Native, Asian, or Native Hawaiian or Other Pacific Islander*. Respondents who indicated more than one race are also shown in the percentage of *More than one race*. For example, if a respondent indicated they were *Asian* and *White*, they were counted in the percentage as *Asian, White, and More than one race*.

The fourth exception pertains to a constructed composite measure (e.g., scales, incident rates, summary variables) described below. For example, a scale for military career support was constructed from multiple items. Individual items in each measure are presented first followed by tabulation pages showing composite measure results.

- *Military Career Support*—A two-item composite measure indicating whether spouse support for the member's military career decreased as a result of the member being away more than expected. This was constructed from Q52 and Q53. The tabulation shows the percentage of spouses who indicated in Q52 that the member spent more time away from home than expected, and who also indicated in Q53 that their support had decreased.
- *Patient Health (PHQ-4)*—The *PHQ-4* is designed to identify potential mental health concerns by measuring the extent that spouses have felt negative emotions, such as depression, anxiety, or nervousness, in the two weeks

before taking the survey. This scale is constructed from Q56a–d and spouses must have responded to all subitems in the scale to be included. Each item is rated on a 1 to 4 scale. Scores on the *PHQ-4* are reported as a single figure, which is the average of the individual scores. A higher total score indicates a higher likelihood of mental illness. For details, see Kroenke, Spitzer, and Williams (2001).

- **Employment Status**—Spouse employment indicators are derived from Q67–70 and are comparable to employment measures used in the U.S. Census Bureau’s *Decennial Census* and *Current Population Survey* (CPS). Two sets of tabulations are presented. In the first set, labor force participation is shown for the spouses of those in the reporting category. The four categories contain percentages of employed, unemployed, not in the labor market, and armed forces. Those not in the labor market includes those who are permanently or temporarily not working and/or not actively looking for work. The second set of data shows only those in the labor market. That is, the percent responding are spouses who answered the items and are in the labor market (civilian employed, armed forces, and unemployed but looking for work). The unemployment rates shown in these tables are the percent of those who are actively looking for work and who are unemployed.

Margins of Error

The complex sample design required weighting to produce population estimates (e.g., percent female).⁹ Because of weighting, conventional formulas for calculating the margin of error will overstate the reliability of the estimate. For this report, variance estimates were calculated using SUDAAN® PROC DESCRIPT (Research Triangle Institute, Inc., 2013).

By definition, sample surveys are subject to sampling error from nonresponse (eligibility and completion). Standard errors are estimates of the variance around population parameters (such as percentages or means) and are used to construct margins of error (i.e., confidence interval half-widths). Estimated percentages and means in these tabulations are reported with margins of error based on 95% confidence intervals. In order to compress the data display, only the maximum margin of error (Max ME) for each reporting category is shown. That is, the tab volume shows only the largest margin of error for the percentages or means in each row. For each average shown in these tabulations, its margin of error is also printed.

The following reporting conventions are used:

- “0” indicates that no one in any reporting group selected the response option,

⁹ As a result of differential weighting, only certain statistical software procedures, such as SUDAAN®, correctly calculate standard errors, variances, or tests of statistical significance.

® Registered 2013 by Research Triangle Institute, P.O. Box 12194, Research Triangle Park, NC 27709-2194.

- NR indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than 5), effective sample size (less than 15), or relative standard error (greater than 0.3),
- NA indicates the question was *Not Applicable* because the question did not apply to respondents in the reporting category based on answers to previous questions,
- No Max ME is printed when all percentages in the row are shown as NR,
- No margin of error is printed for an average when it is shown as NR.

Note. Percent responding are Reserve component spouses who answered the question. The scale ranges from 1 to 4. Higher scores indicate higher levels of depression, nervousness, and/or anxiety. Cronbach's coefficient alpha = 0.87. Cronbach's coefficient alpha ranges in value from 0 to 1. Values 0.70 or greater indicate higher reliability meaning that the items are internally consistent.

56. Patient Health Questionnaire (PHQ-4): Constructed from Q56. Index assesses how often the individual has felt depressed, nervous, or anxious.

Note. Percent responding are Reserve component spouses who answered the questions. Traditional National Guard/Reserve members drill approximately one time per month. In calculating spouse employment status, an individual must have worked in the past week to be considered employed; therefore only one-fourth of traditional Reservists without other employment would be considered employed.

67. OVERALL Unemployment rate: Constructed from Q67–70. Calculated excluding those spouses not in the full labor market; that is, excluding those who were not currently looking for employment or were not needing or wanting to work.

Military Spouse Surveys

2019 Survey of Reserve Component Spouses

Welcome

[Security Protection Advisory](#)

[RCS# P&R\(AR\)2145](#)
[Exp. 01/06/2022](#)

You have been selected to take a survey about your attitudes and perceptions of military life for spouses of Reserve component members. When you click the *Continue* button below, you will be asked to:

- Create a Personal Identification Number (PIN)
- Read the Privacy Advisory
- Take the survey

Thank you for your time and participation.

Section 508 Compliance

The U.S. Department of Defense is committed to making electronic and information technologies accessible to individuals with disabilities in accordance with [Section 508 of the Rehabilitation Act \(29 U.S.C. §794d\)](#), as amended in 1999. Send feedback or concerns related to the accessibility of this website to: DoDSection508@osd.mil. For more information about Section 508, please visit the [DoD Section 508 website](#). Last Updated: 08/13/2013

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION

Your name and contact information have been used only for the distribution of this survey. Your responses to the demographic questions will allow DoD to better analyze all responses among varying demographic groups. Responding to this survey is voluntary. Most people can complete the survey in 30 minutes. There is no penalty to you if you choose not to respond. However, your participation ensures the best data possible is gathered, allowing the Department to make accurate and meaningful changes that impact you, your family, and those of other DoD spouses worldwide.

Additional Information

10 United States Code, Sections 136, 1782, 2358, authorize the Department of Defense to conduct this survey. Information collected in this survey will be used to research a variety of topics, including education, mental and physical health, access to services, child factors, and the impact of military life. This information will assist in the formulation of policies which may be needed to improve programs and services for military members and their families. Reports will be provided to the Office of the Secretary of Defense, each Military Department, and the Joint Chiefs of Staff.

Some findings may be published by the Office of People Analytics (OPA) or in professional journals, or presented at scientific conferences. Your responses could be used in future research. Results from these surveys will be posted on the web: <http://www.dmdc.osd.mil/surveys/>

OPA uses well-established, scientific procedures to randomly select a sample representing the Defense community based on combinations of demographic characteristics (for example, deployment status, component, and gender). Your responses will be kept private to the extent permitted by law. This is your chance to be heard on issues that directly affect you. While there is no direct benefit for your individual participation, your responses on this survey **make a difference**.

Identifying information will be used only by government and contractor staff engaged in, and for purposes of, survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the Walter Reed National Military Medical Center (WRNMMC) are eligible to review research records as a part of their responsibility to protect human subjects in research. In no case will individual identifiable survey responses be reported.

The data collection procedures are not expected to involve any risk or discomfort to you. The only risk to you is accidental or unintentional disclosure of the data you provide. However, the government and its contractors have a number of policies and procedures to ensure the survey data are safe and protected. For example, no identifying information (name, address, Social Security Number) is ever stored in the same file as survey responses.

Survey data may be shared with DoD researchers or organizations outside the DoD who are conducting research on DoD personnel. In many cases, these researchers will be provided with a dataset containing limited demographic information (for example, deployment status, Service, and gender). OPA performs a disclosure avoidance analysis to reduce the risk of there being a combination of demographic variables which can single out an individual. In some instances and only with sponsor approval, OPA may make available datasets with additional demographic variables to a small number of approved researchers. There is some risk individuals might be identified on these datasets; however, OPA implements several procedures to protect the data. Statistical analyses can only be performed after review and approval to ensure identifying information is not released. Access to these datasets will only be allowed on a need-to-know basis with an approved data sharing agreement in place. Researchers approved for access to these datasets must adhere to strict procedures, including—but not limited to—data sharing agreements, secure transfers of data, destruction of files upon completion of research, and authorization to reuse data. In addition, receipt and use of these datasets must adhere to all DoD information assurance, security, and other data use policies.

If you answer any items in such a way that you indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, OPA may notify an office in your area for appropriate action.

You may experience discomfort and/or other emotions while completing the survey. If this occurs, you may contact Military OneSource to find an appropriate helping professional.

FREQUENTLY ASKED QUESTIONS

What is the Office of People Analytics (OPA)?

- The Office of People Analytics conducts Joint-Service surveys including the Status of Forces Surveys, Military Spouse Surveys, QuickCompass Surveys, and Health and Resilience Surveys for the DoD.

What is the Military Spouse Survey Program?

- The Military Spouse Survey Program is a DoD personnel program that features web- and paper-based surveys sponsored by the Under Secretary of Defense for Personnel and Readiness (USD[P&R]).
- These surveys enable DoD to regularly assess the attitudes and opinions of the DoD community, including active duty and spouses of Reserve component members, on the full range of personnel issues.

How do I know this is an official, approved DoD survey?

- In accordance with DoD Instruction 8910.01, all data collection in DoD must be licensed and show that license as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is RCS# P&R(AR)2145, expiring 01/06/2022.

How did you pick me?

- OPA uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., deployment status, component, and gender).

Why should I participate?

- This is your chance to be heard on issues that directly affect you, including the impact of deployments on you, your spouse and children, your employment opportunities, medical and dental benefits, and overall satisfaction with military life.
- Your responses on this survey **make a difference**.

What is RCS-Survey@mail.mil?

- The official e-mail address for communicating with spouses of Reserve component members about Military Spouse Surveys. "RCS-Survey@mail.mil" is short for **Reserve Component Spouse Survey**.

Why am I being asked to use the web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- The survey is administered by our contractor, Data Recognition Corporation, an experienced survey operations company. The survey collection tool starts on a .mil site within OPA. Once you enter your ticket number, you are redirected to a contractor site which uses a .net domain. This allows everyone to access the survey, even from a non-government computer.

Do I have to answer all questions?

- No, it is not necessary to answer every question. Within the survey screen, you have four control buttons: *Next Page* (→), *Previous Page* (←), *Clear Responses*, and *Save and Return Later*. Use these buttons to navigate through the survey or skip questions. Use *Save and Return Later* to give yourself flexibility to complete the survey at a convenient time. When you return to the survey website, enter your Ticket Number to get to the place in the survey where you had stopped.

Why does the survey ask personal questions?

- OPA reports overall results, as well as by other characteristics, such as location and gender. To complete these analyses, we must ask respondents for these types of demographic information.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel so that no groups are overlooked.
- Sometimes sensitive questions are asked in order to improve personnel policies, programs, and practices.

Will my answers be kept private?

- Your response will be kept private to the extent permitted by law.
- If you answer any items in such a way that you indicate distress or being upset, you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, OPA may notify an office in your area for appropriate action.
- All data will be reported in the aggregate and no individual data will be reported.
- We encourage you to safeguard your Ticket Number to prevent unauthorized access to your survey. In addition, to ensure your privacy, be aware of the environment in which you take the survey (e.g., take the survey when no one else is home, take care to not leave the survey unattended).

Can I withdraw my answers once I have started the survey?

- If you wish to withdraw your answers, please notify the Survey Processing Center prior to May 24, 2019 by sending an e-mail to RCS-Survey@mail.mil or calling, toll-free 1-800-881-5307. Include your name and Ticket Number.

Will I ever see the results of the survey?

- OPA posts survey results on the following website:

PRIVACY ADVISORY

Your name and contact information have been used only for the distribution of this survey. Your responses to the demographic questions will allow the Department of Defense (DoD) to better analyze all responses among varying demographic groups. Responding to this survey is voluntary. Most people can complete the survey in 30 minutes. There is no penalty to you if you choose not to respond. However, your participation ensures the best data possible is gathered, allowing the Department to make accurate and meaningful changes that impact you, your family, and those of other DoD spouses worldwide. **Returning this survey indicates your agreement to participate in this research.**

ADDITIONAL INFORMATION

10 United States Code, Sections 136, 1782, 2358, authorize the DoD to conduct this survey. Reports will be provided to the Office of the Secretary of Defense, each Military Department, and the Joint Chiefs of Staff.

Your responses could be used in future research. Results from these surveys will be posted on the web: <http://www.dmdc.osd.mil/surveys/>

The Office of People Analytics (OPA) uses well-established, scientific procedures to randomly select a sample representing the Defense community based on combinations of demographic characteristics (for example, deployment status, Service, and gender). Your responses will be kept private to the extent permitted by law. This is your chance to be heard on issues that directly affect you. While there is no direct benefit for your individual participation, your responses on this survey **make a difference**.

Identifying information will be used only by government and contractor staff engaged in, and for purposes of, survey research. In no case will individual identifiable survey responses be reported.

The data collection procedures are not expected to involve any risk or discomfort to you.

Survey data may be shared with DoD researchers or organizations outside the DoD who are conducting research on DoD personnel. In many cases, these researchers will be provided with a dataset containing limited demographic information (for example, deployment status, Service, and gender). OPA performs a disclosure avoidance analysis to reduce the risk of there being a combination of demographic variables which can single out an individual.

If you answer any items in such a way that you indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, OPA may notify an office in your area for appropriate action.

You may experience discomfort and/or other emotions while completing the survey. If this occurs, you may contact Military OneSource to find an appropriate helping professional.
