## Description & Funding

### Description

**Priority:** Standard

**Date Needed:** 10/15/2019

**Determination Start Date:** 04/14/23

**Description:**

The purpose of this information collection (IC) is to continue CDC's monitoring of funded programs' planning and delivery of public health activities and the programs' collaboration with health care systems. AIRS is the system by which state asthma programs report their progress on National Asthma Control Program developed performance measures (PM), as well as state-level asthma emergency department (ED) visit and hospital discharge (HD) data. Recipients receive funding to implement a variety of public health strategies and activities. CDC collects information related to each recipient's strategies and activities, and the process and outcome PM outlined by the cooperative agreement program.

**IMS/CIO/Epi-Aid/Lab-Aid/Chemical Exposure Submission:** No

**IMS Activation Name:** Not selected

**Primary Priority of the Project:** Not selected

**Secondary Priority(s) of the Project:** Not selected

**Task Force Associated with the Response:** Not selected

**CIO Emergency Response Name:** Not selected

**Epi-Aid Name:** Not selected

**Lab-Aid Name:** Not selected

**Assessment of Chemical Exposure Name:** Not selected

**Goals/Purpose**

The National Center for Environmental Health's National Asthma Control Program (NACP) supports state, local and territorial health departments to better understand the impact of asthma and to encourage a comprehensive public health approach to asthma control. The purpose of this information collection (IC) is to continue NACP's monitoring of recipient programs' planning and delivery of public health activities and the programs' collaboration with health care systems under a new cooperative agreement (EH19-1902). CDC collects information related to each recipient's strategies and activities, and the process and outcome PMs outlined by the cooperative agreement program. NACP-funded asthma programs report their progress on NACP developed

performance measures (PMs), as well as state-level asthma emergency department (ED) visit and hospital discharge (HD) data. A new PM electronic reporting tool has been developed, which will allow recipients to report PM information. Recipients receive funding to implement a variety of public health strategies and activities.

The objective of this information collection is to 1) monitor state and national progress toward achieving the outcomes identified in the National Asthma Control Program's logic model; 2) facilitate aggregate reporting of outcomes to state and national stakeholders; 3) identify and respond to technical assistance needs; and 4) promote continuous quality improvement at the state program and CDC level.

**Objective:**

**Does this project include interventions, services, or policy change work aimed at improving the health of groups who have been excluded or marginalized and/or decreasing disparities?:**

Not Selected

**Project does not incorporate elements of health equity science:**

Not Selected

**Measuring Disparities:**

Not Selected

**Studying Social Determinants of Health (SDOH):**

Not Selected

**Assessing Impact:**

Not Selected

**Methods to Improve Health Equity Research and Practice:**

Not Selected

**Other:**

Not Selected

**Activities or Tasks:**

New Collection of Information, Data, or Biospecimens

**Target Populations to be Included/Represented:**

Awardee Program Managers

**Tags/Keywords:**

Asthma ; AIRS

**CDC's Role:**

CDC is providing funding ; CDC is recipient of materials/services FROM an institution

**Method Categories:**

Other - Collection of performance measures and surveillance data for program evaluation

**Methods:**

Respondents include up to 30 cooperative agreement recipients (state, local, and territorial health departments). Information will be collected from recipients on an annual basis.

**Collection of Info, Data or Biospecimen:**

Recipients will submit standardized PM data on an annual basis via a newly developed electronic reporting tool in SharePoint. The SharePoint site was created to allow recipients to electronically input information for eight core PMs. State-level ED visit and HD surveillance data will be submitted electronically by recipients to a dedicated electronic mailbox.

**Expected Use of Findings/Results and their impact:**

Information will be used for multiple purposes: 1) monitoring state and national progress toward achieving the outcomes identified in the National Asthma Control Program's logic model; 2) facilitating aggregate reporting of outcomes to state and national stakeholders; 3) identifying and responding to technical assistance needs; and 4) promoting continuous quality improvement at the state program and CDC level.

**Could Individuals potentially be identified based on Information Collected?**

No

## Requested consent process wavers

Informed consent for adults	No Selection
Children capable of providing assent	No Selection
Parental permission	No Selection
Alteration of authorization under HIPPA Privacy Rule	No Selection

## Requested Waivers of Documentation of Informed Consent

Informed consent for adults	No Selection
Children capable of providing assent	No Selection
Parental permission	No Selection

## Consent process shown in an understandable language

Reading level has been estimated	No Selection
Comprehension tool is provided	No Selection
Short form is provided	No Selection
Translation planned or performed	No Selection
Certified translation / translator	No Selection
Translation and back-translation to/from target language(s)	No Selection
Other method	No Selection

## Clinical Trial

Involves human participants	No Selection
Assigned to an intervention	No Selection
Evaluate the effect of the intervention	No Selection
Evaluation of a health related biomedical or behavioral outcome	No Selection
Registerable clinical trial	No Selection

## Other Considerations

Exception is requested to PHS informing those bested about HIV serostatus No Selection

Human genetic testing is planned now or in the future No Selection

Involves long-term storage of identifiable biological specimens No Selection

Involves a drug, biologic, or device No Selection

Conducted under an Investigational New Drug exemption or Investigational Device Exemption No Selection

## Data

---

### DMP

Proposed Data Collection Start Date: 10/1/20

Proposed Data Collection End Date: 10/1/23

Proposed Public Access Level: Public

Public Access Justification: Data will be made accessible to the public.

**How Access Will Be Provided for Data:**

Aggregate, de-identified performance measures data will be shared with the public (posted on CDC webpage) and presented at the American Evaluation Association conference. The hospitalizations and emergency departments visits data is publicly available data previously collected by the recipient, not at the request of CDC. This de-identified data is shared with the public on the CDC website.

**Plans for Archival and Long Term Preservation:**

The data will be stored within the SharePoint site for at least ten years. Each state, local and territorial asthma program recipient has access to its own information and surveillance data. The state, local, or territorial cooperative agreement recipient decides the level of access for each user, and to what extent local partners may access that information. State, local, and territory cooperative agreement recipients are required to report periodically as a condition of their award from CDC. The information collected will be neither sensitive nor proprietary in nature. Reporting spreadsheets containing emergency department visit and hospitalization data will be uploaded and stored on the ACHB#s SharePoint site for at least ten years.
