your research is substandard. you are not utilizing american tax dollars successfully or efficiently. the entire program should be investigated for laxity, slipshod work and corruption. your far too close connection with big pharma, revolving doors and overpayment along with sneakiness in your payment schedule and your anti public attitude shows an agency completely out of control. sneaky meetings where the public has no idea what you are spending our tax dollars on. those tax dollars belong to 335 million americans, not you and yet you manage them ineffectively. i would grade this agency as an f minus or a zero. we need criminal investigation to look into this. we are supposed to have government by the people for the people. right now at this agency we have government to make government employees rich who do as little as possible to work for us. this comment is for the public record. please receipt. jean public jeanpublic1@gmail.com
