General Comment

this proposal needs shut down because it is not helpful to the people of america. the cdc is way into money and profits andnot into really helping america. they usually set out proposals thaty make them riechers and make taxpayers much pooorer with no benefit at all.i find this proposal garbled and it appears to be written by an idiot.this entire proposal needs shut down. it needs total defunding.t he cdc desperately needs new management. it is nto being run efficiently or honestly under fauci. he needs to be under invesgiation imo. no american tax dollar for this budget and proposal should be spent. the american people are getting bad govt from the cdc. they are dishonest and liars and propagandists.

General Comment

There is no valid reason for the addition of the COIVD vaccine to the childhood vaccine schedule. This experimental shot is NOT actually a vaccination in that it does not protect nor prevent COIVD. We will not be as willing, as it seems you are, to put our children at risk for whatever political, monetary or personal rationalizations this committee uses in it's decision process. This will be yet another governmental over reach that will insure the demise of public schools.

No one.

Not a single one of us.

Regrets not taking it.

And we won't let anyone MAKE us give it to our kids....

General Comment

Leave our children out of your experiments. Vaccine for HPV is not necessary and Covid vaccine is causing more damage to young lives then the virus. These are not actually vaccines by old standards since they do not prevent but only may lessen. Stop pandering to big Pharma.
