The trainee survey is extremely confusing.

For example, this survey is given after a certificate course is completed however it asks if they are taking a course today. Secondly, this survey goes to people who completed a course and #20 asks if they completed a course in the last 5 years. #30 isn't worded correctly to be relevant if this is completed after the course.

Many of the skills in #35 don't relate to the course of certain tracks that were chosen. It may be confusing to the trainees and make them wonder if they are even filling out the right survey since it doesn't pertain to the course they took.
