General Comment

shut down entire federal apparatus to manage. their management is corrupt, criminal, unhealthy for all america. they are propagandists in the nazi tradition. their work is worth zero or f minus. the \$92 billion we are giving this agency year after year after year is not buying u\s a decent cancer program. we have nothing being researched on preventing cancer in the first place by taking toxics out of our diet. we are dying earlier of cancer.babies are getting cancer showing that the program of cdc is worthless. let the states health dept have the money for a year or two and see how they do with it. maybe they can move us forward. this proposal just throws good money after the bad we are paying for the federal cdc control of cancer research. the progress of cancer research at the cdc has been worthless with no advancement in eons. fire all at cdc in cancer management. this cdc is a lousy fake propagandist and spend most of our money propagandizing america instead of doing real work on research. lets examine how much of our \$92 billion is being spent on propagandizing and hiring workers at the cdc todo that. they hire many people to get into socialmedia and stop public discourse. this is a negative agency and needs shut down completely. no funding.
