General Comment

1. not necessary 2. not accurate 3. cant be enhanced 4. wasteful prurient getting into private matters none of the cdc business, except for sex fiends.
i very much believe this agency has no right to restirct public commetn in any way shape or form. i believe we have open and transparent govt and should have that but this is one sneaky agency. we also should have a govt by ghe people for the people, but instead we have this sneaky release no information agency and let this agency get away with highway robbery with their totally inflated 92 billion dollars financing by us taxpayers. the taxpayers for that money are treated with utmost disrespect. foia rrequests are delineated so that nothing is available to the interested us public. in addition this agency wants 76 years to answer foia requests. the whole package is deplorable, anti american, anti democracy and these clowns have been getting away with it as if they are some superior race. govt of the people by the people should be the watchword here.this agency is destroying govt of the people by the people.nobody in america needs this survey or information.birth stats are already kept byt the states health depts.this survey is not needed at all. it appears to be the work of sme sex fiend. this does not need to be funded under the publi health law. this agnecy has gone much too far in spending money for their own secret fun parties. i would grade this agencys work as worth an f minus or zero. we have gotten along without this survey before . lets do so now.
