

TI has designed the following five questions to ask the focus group participants:

1. How would you describe the role of the Technology Innovation branch in SLS?
2. Provide some examples of how our branch can better serve and support faculty and staff.
3. When you attend training about educational technology, what kind of session format do you find useful for your learning?
4. How can we better support your educational technology needs for language instruction?
5. How do you typically seek help or support when you encounter difficulties with educational technology?
