General Comment

I believe that gathering information under the name of the Indian Self-Determination and Education Assistance Act contracts is very important for India. This law was passed to protect the rights and interests of Indigenous people in India, and I support the initiative of the Indian Health Service to gather information about its implementation.

Gathering information will allow us to assess the effectiveness of this law and identify the problems facing Native Indians in India. We will be able to determine what steps need to be taken to improve the situation and provide more equal opportunities for all Indian citizens.

I encourage all Indian citizens to participate in this information gathering and express their views on the implementation of the Indian Self-Determination and Education Assistance Act. Together we can make this country more just and equal for all its people.
