All this will do is cause more an worse accidents on the road. You can not replace the driver. My cell phone loses signal what u think will happen with an 80,000 pound killing machine. That runs off satellites an such things. Cause I have never heard anyone talk about this but what happens when this truck gets pulled over for a dot inspection. Who and wear will the tickets be wrote to. Let's just stop this their are some jobs u need a human to do.
