General Comment

Afternoon,

As of this afternoon I'm still not seeing trucks as a mode.

Much the information you are requesting in this revision would be easier to track at the summary level. As an example - increase in contracts (item 20) into the sub categories you need - new export sales, changes in marketing year, change in commodity, change in destination, etc. It would be easier and less time consuming to enter by sub-categories to get the total by commodity and country. Same with decreases - enter by sub categories with comments for the larger shipments.

During my testing it took a great deal longer to enter into the proposed new system.

Thank you.
