

Transition Experience Survey

Transitioning research and development (R&D) to operations, applications, commercialization, and other uses is becoming a growing priority at NOAA. We are working as a community with other OAR labs and program offices to provide the best guidance regarding the management of R&D transitions. To better identify the baseline understanding of NOAA transitions and potential transition needs from researchers and managers, we created a short survey. The survey is completely anonymous and your participation will help shape the guidance and processes coming from NOAA Headquarters.
