General Comment

this dept shows no evidence at all of wise management. none. the mgt is slanted, biased, prejudiced, conflict of interest and should be criminally investigated for the poor way they protect nature. fact is hunters shoot at anything that moves. they have proved this by endless killing of people. hunters show they lie. this is proven by the reports of conservation park officers who exhibit a hunter shooting and killing and then when they ask the hunters about it the hunter lies all of the time. when the evidence is produced to the hunter, then the hunter tells the truth. over and over we have seen this over 25 years in the reports of conservation officers. they lie like fishermen. so then how is this collection of fake information meaningful at all. it is not. it is full of lies and you have management on it. horrific. you waste taxpayer dollars to collect hunter lies. the bird population is declining precipitously. because hunters kill anything that moves. they don't care if it's endangered. why should taxpayers fund this for 3 years. when it's a waste. one year more and we need to see what information you get. you hide the information you get from the us public who pays taxes for this crap you collect. stop all hunting and trapping and let the birds populate and live. that is the way to go now. just stop the insanity of allowing human beings to kill for their fun at killing. they get enough freebies from welfare to buy the food they eat so there is no fake reason that they need to kill an animal to eat. that is fake. and stop allowing into this country all those citizens who eat dogs and cats and other animals. we want to save and protect animals and we feel strongly about that. we are sick of the abuse and insanity that is going on. this is not 1860. this is 2023. we should be intelligent enough to stop this horror. carrying on shows the worse part of humanity, the devil side. this agency is not wise. it is carrying on insanity.
