### Comment

I support the proposed rule to amend the Standards for Safeguarding Customer Information. Attacks on financial institutions are happening consistently and when customer data leaks occur it is important the commission and the public are informed. By informing the Commission of these attacks it can better help come up with preventatives for the future. It is also important for the public to know of these customer information leaks in order for citizens to make informed decisions whether to use said financial institution. If one institution is consistently getting customer information leaks Commission should then help find a solution.
