As even the latest Rev 5 FedRAMP requirements w/the new Supply Chain does NOT fully result in evaluation of conformance with all element in the attestation form, will the government be changing the FedRAMP 3PAO assessment to add this control requirements? The FedRAMP Rev 5 controls for Supply Chain help ensure a provider meets secure development concepts, but NOT as specified, so either attestation text should be updated to reflect this, or new FedRAMP controls are added and supplemented.
