FS-2023-0002-0003 Details Optional Details Submitter Info Attachments (0) * Required Field 🔇 Viewable on Regulations.gov Actions Comment * 3 I see the developers and the oil and gas industry trying to influence this proposal for all the corrupt and greedy reasons. I recommend we do not ease regulations or shortcut the NEPA process , to better protect the environment. The only wildfire mitigation we should be doing is a let it burn policy, because we know the suppression management helped lead to our fuel load, and climate change caused by fossil $fuel \ production \ and \ consumption \ is \ the \ cause. \ If \ we \ prevented \ developers \ from \ building \ in \ flood \ and \ fire \ zones \ we \ would \ not \ have \ the \ fire \ from \ building \ in \ flood \ and \ fire \ from \ building \ in \ flood \ and \ fire \ from \ building \ in \ flood \ and \ fire \ from \ building \ in \ flood \ and \ fire \ from \ building \ in \ flood \ and \ fire \ from \ building \ in \ flood \ and \ fire \ from \ building \ from \ bui$ tragedy and damage we have experieinced. So, let it burn, do not rebuild, employ no growth tools, Natioanlize the fossil fuel industry, seize their assets and use thos assets to help transition to freen energy.
