The new regulations proposed here are not inclusive and do not facilitate improvements applicable to all friends groups, specifically those which operate and are managed by volunteers alone. Additionally, the proposal does not go into specifics regarding its "form" collection of information. And the stringency of the collection of the reports of activity from friends groups, applicable to assume is all friends groups, does not take into account that some groups are poorly staffed, under funded, volunteer only, in its capacity to report on the standards of groups who are of greater means and ability.
