General Comment

this agency does not work for public health. it works to approve crap vaccines so they can put more money in their pockets imo. they are about riches for themselves by the revolving door between big pharma and the cdc to push vaccines into every body in america. the example of the past 3 years when the cdc just about wrecked america, put people out of jobs because they made the vaccine mandatory so that there was no choice no informed consent, just do it and spending our taxpayer dollars to propagandize to try to fool the american people into taking this ugly harmful vaccine. the cdc is shameful, duplicitous, lying and dishonest to the american people imo. they put out propaganda and have no adequate documentation to back up anything they tell the people to do. negligent clinical trials. some have no clinical trials at all. i do not believe this is a competent workforce at all. they are a workforce who inflicts a substandard vaccine and drugs to kill americans. i do not support any fellowship programs for this agency. in fact, i think we should reduce this agency by 75% immediately. i think we need a criminal investigation to start immediately of what they tried to put over on america based on lousy, bad alleged science. we need much less of this agency. defund them. fire 75% of them. start a criminal investigation please.
