General Comment

Please consider adding a "notes" field to the end of the chart in the Medication List section of the Standardized Format. This would bring the total columns to 5 for that section. This would be for a health plan or PBM to be able to provide information to the beneficiary that is specific to the medication. We have had questions come from beneficiaries regarding how long they will take a medication or tips for taking the medication and this new column would allow us to put that information in a place where the beneficiary can reference when needed.
