It is a nightmare and as a kid I was proud to be born in the US, but in Germany I'm treated as if I am a criminal. Almost no monetary institution is willing to accept American clients. And with the knowledge of possible extreme high claims of damages I can somehow understand the institution. But still I need a bank account close by. I pay much more taxes in Germany, as I would have to in the US. So filling out the forms is of no use for the US and steals my time. Why do the US besides Eritrea treat citizens abroad in this harassing way? Please change this!
